Math Olympiads Information and Criteria for Selection

Math Olympiads is a pull-out enrichment program for 5th and 6th grade students at both Jack Abrams and Woodhull in which students prepare for monthly online Math competitions. These competitions take place from November to March and students worldwide in grades 4-6 compete against one another solving challenging problems. During the 40 minute weekly class sessions, students practice the types of questions given during the competitions and evaluate their solutions. In order to be selected for this program, all 5th and 6th graders in Huntington take a sample paper-based test during the school day in the fall and the top scorers on that test are invited to join. You do not have to be in the SEARCH program to be part of Math Olympiads.
